

電磁バレル研磨機 EMB-190SC2

ELECTRO-MAGNETIC BARREL FINISHING MACHINE

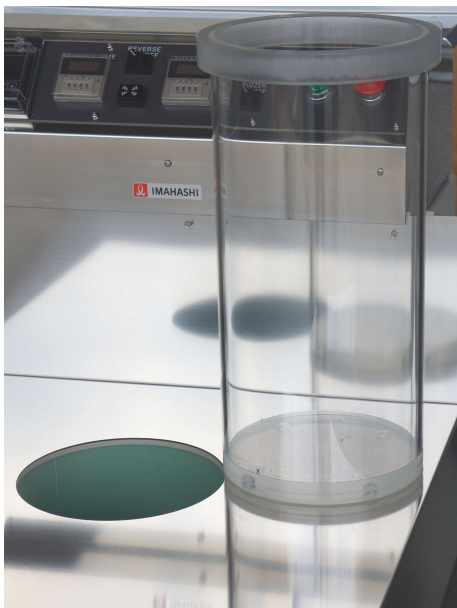

電磁バレル研磨機は金属の部品の微少バリ取り及び研磨等に使用されます。

ワークとメディアを容器に入れて機械の中に入れると、電氣的に作られた交番磁界のために激しく転動し、短時間で美しい表面が得られます。

These electro-magnetic barrel finishing machine are used for finishing small material and metallic parts.

Workpieces and magnetic media are put in a container, which is then placed in the machine. The tumbling motion by a strong alternating magnetic field induced electrically makes the workpieces surface shiny in a short time.

EMB-190SC2

専用容器(リブ無)

- 表面粗度の向上
- Homogeneous surface roughness

- 酸化皮膜除去
- Removal of oxide film

- 微細バリ取り
- Removal of fine burrs

- 洗浄、脱脂
- Cleaning
